

The NEICC is proud to announce the ...

New England High School Competitive Series

We want student-athletes to continue competing in figure skating, as a recognized team/club for their High School or High School Region.

Become the next [NEICC High School Figure Skating Team Champion](#) or compete at the [US Figure Skating High School Finals](#) in April.

(Note for the 2016/17 year, any high school team/club is eligible to compete at the USFS High School Finals!)

The season commences in October and ends in April. New England High School competitors may cross state lines to compete and enjoy the opportunity to accumulate as many points as they can to increase their chances of becoming the NEICC High School Figure Skating Team Champion. All events are held on weekends or school holidays.

The Program Development Committee created this event to encourage and foster more competitive participation opportunities for student-athletes throughout high school. We look forward to the future of High School skating and welcome your participation in great events such as this!
